Cyber Liability Insurance Readiness Assessment

Solution Brief

Determine how ready you are to face ever-evolving cyberthreats.

With today's increased frequency of cyberattacks, organizations must be forced to upgrade their security infrastructure. They need a solution that provides the security technical capabilities to help them successfully qualify for cyber liability insurance.

Cyber liability insurance (also known as cyber insurance) provides a general line of coverage for mitigating losses and costs from cyber incidents like data breaches, network damage and potential business interruptions. Insight has researched the requirements of multiple cyber liability insurance providers and developed a technical capability assessment to identify actions to help you increase your eligibility for liability coverage and decrease your annual premiums.

With Insight's Cyber Liability Insurance Readiness Assessment, we identify what improvements are required in your environment to successfully apply for insurance.

Key deliverables include:

- Mapping security products into the Cisco® cybersecurity capability model
- Current-state maturity assessment
- Target-state cybersecurity capability maturity
- Cybersecurity capability roadmap with high-level project overviews

Why Insight for cybersecurity

- Our team performs a thorough assessment to better understand your unique environment to recommend a personalized, sustainable security solution.
- We provide comprehensive services across key areas to meet your security needs.
- We are Certified Information Systems Security Professionals (CISSPs), Cisco Certified Internetwork Experts (CCIEs) and Qualified Security Assessors (QSAs) with more than 20 years of cybersecurity-services experience.
- We have experts certified on ISO 2700x, the National Institute of Standards and Technology (NIST), Payment Card Industry (PCI), Health Insurance Portability and Accountability Act (HIPAA), Health Information Trust Alliance, Cybersecurity Maturity Model Certification (CMMC) and General Data Protection Regulation (GDPR) standards.
