License Reconciliation Services

Why Insight for license reconciliation services?

When it comes to software licensing, mitigating risk and ensuring compliance are always top of mind for organizations. And often, the path to compliance is unclear. Software licensing conditions are constantly changing and becoming more complex.

Insight's License Reconciliation Services (LRS) help you cut through these complexities, keeping you more informed about your software assets so you're always a step ahead. Here are some of the things Insight brings to the table:

- First Microsoft® Gold reseller in Software Asset Management
- Dedicated consultants each with 10+ years of experience
- Strong global footprint in North America, Europe and Asia-Pacific
- Innovative and flexible license management solutions

Insight is your expert connection to the licensing solutions that help businesses run smarter.

How license reconciliations will help your business

Insight helps you achieve reconciliation by answering three main questions: what software you're entitled to use (license assessment), what software is installed (inventory and deployment review), and what the difference is between the two. This broad visibility will help you:

- Get a more in-depth look at your assets.
- Prevent over- or under-buying.
- Gain valuable insights to stay compliant.
- Mitigate risk and avoid audits..

Customized License Reconciliation Services

Insight's license management experts help you analyze and reconcile your purchase history details to determine what you're entitled to use. We compare your license entitlements to software deployed on your desktop computers and file servers, providing you with your overall software compliance risk and suggestions.

Recommendations vary by client but may include streamlining purchasing and software deployment processes, purchasing additional software licenses or reallocating licenses you already own. We'll also help you determine what software licenses you have over- and under-purchased.

Candidates for LRS	Microsoft® Enterprise Agreement customers or any organization wanting to know if it's compliant with its software licenses.
Publishers	Top request is for Microsoft and other desktop publishers. However, an LRS can be completed for almost any desktop and server publisher.
Time frame	Typical LRS engagement lasts for 30–90 days.
Deliverables	▪ LRS Schedule and Executive Summary ▪ Can also be delivered via Enterprise License Dashboard

Start simplifying your licensing environment.

See how Insight can help you reconcile your licensing and manage your assets more effectively. With proven experience, capabilities and innovation, we're committed to giving your business unmatched visibility to help you succeed.
