

Endpoint Management Workshop

Manage and protect your devices, your apps, and your users

"Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities."

- Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

Enable users to be productive, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

Workshop Highlights

Why you should attend:

Experience the power of modern device management within your own environment. This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

Learn how to improve your management capabilities with Microsoft Endpoint Manager.

Discover & Protect your endpoints by enforcing policies and deploying security tools.

Secure your users' identities with multifactor authentication & conditional access from any device.

Enable your users to be productive with the applications they need, on the devices they want.

What to expect:

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll work with you to:

- **Learn** how to improve your management capabilities with Microsoft Endpoint Manager
- **Discover & Protect** your endpoints by enforcing policies and deploying security tools
- **Secure** your identities with multi-factor authentication & conditional access from any device
- **Enable** your users to be productive with the applications they need, on the devices they want

Who should attend:

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers

Why Insight?

When it comes to unified endpoint management you need an experienced partner.

At Insight, we define, architect, implement and manage solutions that help your organization run smarter.

We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.

Insight Microsoft Credentials:

- Microsoft Gold Partner
- #1 Partner for MCAP Workshops
- Co-sell Impact Award
- National Large Solution Provider Impact Award
- Tech Intensity Impact Award
- Microsoft Windows Virtual Desktop Advanced Specialization
